

ROOTER

LAUNCH A COIN FOR ANYONE. ROOT FOR THEM.

Rootbot is the mark. The eyes are the switch: asleep while a coin's person hasn't claimed, awake once they have. One neon accent on near-black, Bricolage Grotesque for the wordmark, Geist Mono for everything else.

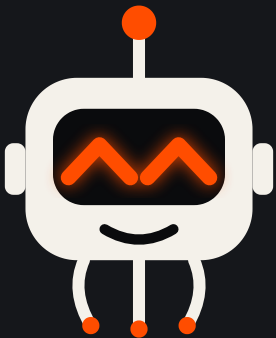

ONE BOT. EVERY SIZE.

UNCLAIMED

EYES SHUT · TIPS GREY · 2% HELD IN ESCROW

CLAIMED

EYES LIT · TIPS RALLY · 1.5% PAID DIRECT

The site's claim switch flips Rootbot between these two faces as it moves the fee split. Use the asleep face anywhere a coin's state is unclaimed: coin pages, cards, badges. Never show a lit face on a coin whose person hasn't claimed; that would read as an endorsement.

CLEAR SPACE

Keep one antenna-height of empty space around the mark, and the height of the O around the wordmark.

MINIMUM SIZE

Full mark down to 32px. Below that, use favicon.svg, which drops the mouth and thickens the roots.

ONE ACCENT

Rally is the only accent. It marks the antenna, the eyes, the root tips, and one call to action per screen.
